- Maximum allowed power for on-board vessels 2 Watt
- Best sensitivity ever (No other radio can compete)
- Reduced speech delay and best audio quality ever.
- IEC 60945 - Maritime approved
- EN 300 720 - ETSI Radio standard
- Easy to use
- UHF frequency to propagate inside metal structures
- Pilot tones/CTCSS for secure group communications
- Large Ex approved PTT (push to talk) buttons for easy operation (NEXUS connector to connect headsets as A-kabel, SAVOX, Peltor, Titan, etc.)
- Ex approved close talk / speaker microphone.
- Origin Denmark

Fires can occur anytime, so you need the right equipment for on-board to keep your crews and vessels safe.

With the right UHF Intrinsically safe radio you can stay truly safe, as well as fully compliant.

Non-complying vessels can be detained, incurring significant costs and delays to their shipping schedule.
